

LUCAS WELTER BOHRER

AI & TECHNOLOGY ENGINEER

Novo Hamburgo, Rio Grande do Sul, Brazil | +55 51 99750-5450 | bohrer.welter.lucas@gmail.com

PROFESSIONAL SUMMARY

Artificial Intelligence and Electrical Engineering student with a strong hands-on background in technology, automation, electronics, software development, and technical problem-solving. Currently pursuing a Technology Degree in Artificial Intelligence at FIAP and a Bachelor's Degree in Electrical Engineering at Universidade Feevale. Experienced in developing practical technology projects involving artificial intelligence, automation, embedded systems, software, and prototyping. Strong interest in AI agents, AI-assisted development, system integration, APIs, automation, and emerging Microsoft AI technologies. Skilled at investigating technical problems, identifying root causes, developing practical solutions, documenting technical information, and communicating technical concepts clearly. Highly adaptable, proactive, and motivated to work in international technology environments.

PROFESSIONAL EXPERIENCE

Electrical Engineering Intern — E2PS

2026 – Present | Remote, Brazil

- Support engineering activities and technical documentation in a professional remote environment.
- Work with structured technical information, documentation, and technology-related processes.
- Contribute to technical projects requiring analysis, organization, problem-solving, and attention to detail.
- Collaborate with team members in a remote environment and continuously develop technical knowledge.

Electronics Maintenance Technician — Eletrônica Digital

2021 – Present | Brazil

- Diagnose and troubleshoot complex hardware and technical problems, analyzing failures to implement practical solutions.
- Provide direct technical support to customers, explaining complex technical issues in a clear and accessible manner.
- Investigate problems systematically, prepare service estimates, and maintain detailed service records.
- Manage multiple technical requests while prioritizing issues according to customer needs and operational urgency.

SELECTED AI & TECHNOLOGY PROJECTS

Axion — AI-Based Interactive Robot | Personal Technology Project

- Developing a compact interactive robot combining AI concepts, embedded systems, sensors, display technology, and software.
- Implementing real-time interactive behaviors based on sensor input, exploring physical applications of intelligent agents.

AI-Powered Robotic Arm — Industry 4.0 | Academic / Tech Project

- Developed a robotic arm integrating physical automation with artificial intelligence principles for Industry 4.0 applications.
- Presented the project at technical events, effectively communicating engineering concepts to diverse audiences.

Semi-Automated Solar Panel Cleaning System | Engineering Project

- Designed and prototyped physical components using 3D modeling/CAD for energy efficiency; received the highest academic evaluation.

Biodigester for Energy Generation | Engineering & Sustainability Project

- Developed a sustainable engineering concept focused on biogas generation and renewable energy production.

EDUCATION

Technology Degree in Artificial Intelligence

FIAP — Brazil

Currently pursuing | 2026 – Present

Bachelor of Electrical Engineering

TECHNICAL SKILLS

AI & Automation: AI Agents, Generative AI, Prompt Engineering, AI-Assisted Dev, Industry 4.0

Software & Web: C Programming, Full-Stack Dev, Git/GitHub, Debugging & Troubleshooting

Universidade Feevale — Brazil

Currently pursuing | 2026 – Present

Professional Electronics Training

Escola META — Brazil

Focus on circuit analysis & troubleshooting.

LANGUAGES

Portuguese: Native

English: B2 (Upper-Intermediate)

APIs & Systems: REST APIs, HTTP, JSON, Client-Server Architecture, System Integration

Engineering & Hardware: Electronics Maintenance, Circuit Analysis, Microcontrollers, 3D Modeling/CAD, Rapid Prototyping

PROFESSIONAL INTERESTS

- AI Engineering
- AI Agents
- Microsoft AI
- Copilot Studio
- Solutions Engineering
- API Integrations
- PoC Development
